PROFESSIONAL SUMMARY

Graduate Software Developer with a completed Bachelor of Computer and Information Sciences in Application Development and distinction-level academic performance. Hands-on experience building C#, ASP.NET Core MVC, SQL-based, and Android applications across academic and portfolio projects. Previous finance and administrative experience strengthened attention to accuracy, process discipline, troubleshooting, and understanding of business workflows.

TECHNICAL SKILLS

Languages	C#, Kotlin, Java, JavaScript, HTML, CSS
Frameworks	ASP.NET Core MVC, Entity Framework Core, MVVM, MERN stack, REST APIs
Databases	SQL Server, SQLite, MySQL, MongoDB, Firebase Firestore, Room
Cloud & Tools	Azure, Firebase, Git, GitHub, GitHub Actions, Visual Studio, Android Studio, SonarCloud
Concepts	MVC architecture, layered architecture, role-based access control, CI/CD, secure coding, Agile development

PROJECTS

HealingInWriting | .NET 8, ASP.NET Core MVC, EF Core, Azure SQL/Azure App Service

- Built a web platform for a Cape Town non-profit with role-based access for guests, volunteers, and administrators.
- Implemented event management, RSVPs, volunteer hour tracking, resource discovery, and survivor story sharing workflows.
- Applied service-based business logic, repository pattern, AutoMapper, Google Books API integration, and POPIA-conscious design.

TightBudget | Kotlin, Android, Firebase, Room, MVVM

- Developed an Android budgeting app with expense tracking, recurring transactions, receipt capture, and budget visualisation.
- Used offline-first patterns with Firebase and Room and structured the app for maintainability and cross-device synchronisation.
- Included gamification features such as streaks, achievements, and challenges.

CivicConnect | ASP.NET Core MVC, EF Core, Data Structures and Algorithms

- Created a municipal issue reporting platform with event management, role-based authentication, and database persistence.
- Implemented BSTs, AVL trees, heaps, graphs, and queue-based logic for service request prioritisation and recommendations.

Crypsis | MERN, MongoDB, JWT, SonarCloud

- Built a secure payments portal with customer and employee flows, JWT authentication, RBAC, and step-up authentication.
- Applied security hardening with Helmet, rate limiting, sanitisation, password hashing, account lockout, and masked sensitive data.

Additional projects | *ASP.NET Core MVC, C#, SQL Server, Azure*

- Built supporting portfolio projects including CMCS, Recipe Tracker, KhumaloCraft Emporium, and AgriEnergyConnect.
- Features across these projects include PDF generation, automated calculations, Azure deployment, admin workflows, and layered architecture.

PROFESSIONAL EXPERIENCE

STC International - Finance Clerk | *Cape Town, South Africa* | *Feb 2016 - Sept 2021*

- Managed student, client, supplier, and financial administration across bookings, invoicing, receipts, petty cash, and Sage processing.
- Supported payroll tasks, cash flow updates, management accounts, debtor follow-ups, and audit requests.
- Provided internal IT support, including laptop and desktop setup, printer troubleshooting, and secure backup handling.
- Built an Excel-based automation solution using IF and VLOOKUP functions to reduce manual repetition and improve accuracy.
- Acted as Interim Financial Manager in February 2020 and helped support system migration to DataSwift.
- Trained newly onboarded Durban branch staff remotely on finance and administrative systems.

EDUCATION

Bachelor of Computer and Information Sciences in Application Development - IIE Varsity College | 2023 - 2025 | Overall average: 89.78%

Higher Certificate in Mobile Application and Web Development - IIE Varsity College | 2022 | Overall average: 88%

Financial Management N6 - Northlink College | 2015

Business Management N6 - Northlink College | 2013

ACADEMIC ACHIEVEMENTS

- Golden Key International Honour Society, 2025
